In re application of : Julio Casanova
 Serial No. : 10/789858
 Filed : February 27, 2004
 For : MODULAR BATTERY PACKAGE
 Docket No. : SP-1785.1 US

RESPONSE

This paper is submitted in response to an Office Action mailed June 05, 2006, in the above-identified application. The Office Action requires election of a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant hereby elects Species I: A battery package as shown in Figures 1-6, without traverse.

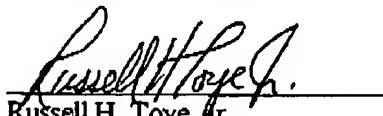

Claims readable on Species I are: 1 – 12, 19 – 34, 38 – 41.

Applicant believes that in addition to claims 1 – 12, 19 – 29, 31 – 32, and 39 – 41, claims 30, 33, 34, and 38 are also generic, based on the Examiner's reason for Species I and II being independent or distinct species (the pockets in the second species have a different configuration than those in the first species).

This reason does not preclude modules in either species I or Species II from having different numbers of pockets, for example (claim 30 would read on such a package), or more than one battery per pocket (claim 38). Claims 33 and 34 are generic because they both read on Figs. 7, 9, and 10, as well as Figs. 1 – 6.

Respectfully submitted,

6/22/06
